

Template Auto Parameters Solutions

Template Non-Type Parameters in C++17

- (Optional) Rewrite the following code using C++14 syntax

```
template <auto value>
```

```
constexpr auto constant = value;
```

```
constexpr auto const IntConstant42 = constant<42>;
```

```
template <typename Type, Type value>
```

```
constexpr Type constant = value;
```

```
constexpr auto const IntConstant42 = constant<int, 42>;
```
