

Order of Evaluation Exercises

Order of Evaluation in Older C++

- In C++14 and earlier, what will be the values of `i` and `arr[i]` after the following statement is executed?

```
int i = 0;  
arr[i++] = i;
```

- Explain your answer

Function Arguments

- In C++14 and earlier, how would you expect the following function call to be performed?

```
func(f1(x), f2(y, z));
```

- Explain your answer
